Portfolio : bit.ly/yoefanto-portfolio | linkedin.com/in/yoefanto

Professional Summary

Technology professional with over 13 years of experience in full-stack web development, DevOps automation, and database administration. Proven track record of upgrading legacy systems (PHP/Laravel, CodeIgniter) to modern architectures (Next.js, Express.js, PostgreSQL) and resolving critical infrastructure bottlenecks. Experienced in leading developer teams, architecting multi-repo containerized environments, and leveraging AI coding assistants for enhanced engineering productivity. Adept at driving digital transformation and ensuring highly scalable and maintainable enterprise applications.

Professional Experience

Assistant Manager - Management Information System Division

March 2021 – Present

PT. Jurnalindo Aksara Grafika (Bisnis Indonesia Group)

- Spearheaded the design, development, and modernization of enterprise applications, managing project timelines and collaborating with QA/IT Analysts.
- Led a developer team to architect an internal HRIS System (Personnel, Attendance, Payroll, ESS Modules) and ERP System (Marketing, Finance, Accounting) using Next.js, Express.js, and PostgreSQL.
- Transformed the legacy recruitment web and CMS from PHP (CodeIgniter)/MySQL to a modern JavaScript stack (Next.js, Express.js)/PostgreSQL, significantly improving performance and scalability.
- Engineered a multi-repo application architecture utilizing Docker containers to seamlessly decouple frontend, backend, and PostgreSQL database environments on WSL Ubuntu.
- Resolved critical production server incidents, including stabilizing a web server with an extreme load by diagnosing and mitigating CPU-exhausting PHP processes via system profiling tools.
- Evaluated and integrated AI coding assistants to optimize developer workflows and accelerate the management of decoupled application codebases.
- Maintained and developed new features for multiple high-traffic news portals (Hypeabis.id, Bisnisindonesia.id, Dataindonesia.id).

IT Staff - Management Information System Division

December 2012 – February 2021

PT. Jurnalindo Aksara Grafika (Bisnis Indonesia Group)

- Developed and implemented various internal modules (HR, General Affairs, Strategic Initiative, Internal Audit, Company Secretariat) using PHP (Laravel/CodeIgniter) and Oracle Database.
- Maintained and optimized Oracle databases and legacy Oracle Forms/Reports applications.
- Administered Oracle Linux OS, Oracle Developer, and Oracle Database deployments across servers and company branches.

Integrated Lab of Gunadarma University

- Developed and monitored the Integrated Lab Website and student registration system using PHP and MySQL.
- Implemented and researched MySQL database replication to ensure system high availability.

Technical Skills

Languages & Frameworks	PHP (Laravel, CodeIgniter), JavaScript/TypeScript (Node.js, Express.js, React.js, Next.js), HTML/CSS
Databases	PostgreSQL, Oracle Database (10g/11g), MySQL/MariaDB
Infrastructure & DevOps	Docker, Kubernetes, GitLab CI/CD, Jenkins, Linux (Ubuntu/Oracle Linux), WSL
Enterprise Tools & Concepts	Oracle Developer (Forms, Reports), Oracle Apex, RESTful APIs, System Architecture, Agile/Project Planning

Education & Certifications

Informatics Engineering (S1)	2007 – 2011
Gunadarma University	
GPA: 3.30	
Software Engineering	2004 – 2007
SMKN 1 Cibinong	

Certifications & Training

- Optimize Internal Spend & Maximize Your Cost Function (PT. Metrodata Electronics, 2023)
- Create The Future With Google Gen-AI (PT. Metrodata Electronics, 2023)
- Kubernetes for the Absolute Beginners (Udemy Online Course, 2023)
- Next.js & React - The Complete Guide (Udemy Online Course, 2021)
- Oracle Database 10g: Admin 1 & 2 (PT. Jurnalindo Aksara Grafika, 2013)
- Building Mobile Commerce Solution & Basic User Linux (Gunadarma University, 2009 & 2011)
